What each funding route is meant to build

Preparation map · updated source table, 13 October 2026 · call dossiers are being completed

Dots show proposed work-package fit, not eligibility, selection or a committed funder.

	A Operation	B Discovery loop	C World models	D Verification	E Laboratory	F People	G Domain depth
01 Pathfinder Challenges 2026		●		●		●	
02 Foresight science / safety nodes	●						
03 Rolling open-research grants	●					●	
04 Compute and model-usage support	●		●				
05 Energy-system foundation models			●				●
06 SPRIND: AI-native chip design				●			●
07 RAISE automated materials discovery		●		●	●		●
08 Frontier AI: model scaling	●			●			
09 Pathfinder Open 2027 · draft		◐	◐	◐		◐	
10 Frontier AI: safe and efficient	●			●			
11 Pathfinder Challenges 2027 · draft		◐	◐				
12 Company / physical-AI instruments							
13 National company funding / investment	●	●	●	●	●	●	●

Readiness is carried by the call dossier. Generic/mixed routes must be split into individual instruments.

A / Operation Metered operating and useful-output reports

B / Discovery loop Replayable cycles for two domain clients

C / World models Open models and validity-scoped reports

D / Verification Independent checks and enforced boundaries

E / Laboratory Instrument-to-record experiment cycle

F / People Staffing, institute and shared human review

G / Domain depth Domain-owned model / solver validation

P / FIRST TEAM: 12 months · EUR 1,533,693 · 48 person-months · preliminary, negotiable.

This source case prices A operation, B loop, C first-family baselines and F people. It does not fund every laboratory.

Other separate cases: T1 / 12 months EUR 95,797 · T2 / 36 months EUR 6,018,462 · T3 / 36 months EUR 6,924,406.

Model usage is a list-price estimate, not paid burn. Quotes and actual payment timing remain open.
